

7. Deployment & Implementation Phase

The deployment phase focuses on preparing the developed Auto Ticket Classification using Flow Designer project for final use, demonstration, and sharing.

Before deployment, the project update set is moved from In Progress to Complete. The completed update set can then be exported as an XML file so that the configured project data can be shared or transferred to another environment. [?](#)

Auto Ticket Classification using Flow Designer.pdf

Deployment Steps

Open All → Local Update Sets.

Open the Project Update Set.

Change the State from In Progress to Complete.

Save the update set.

Select Export to XML from the Related Links.

The update set data is downloaded in XML format.

The downloaded XML file can be shared through email or other methods. [?](#)
